

Manufacturing General Labourer (Future Apprentice)

Job ID: MFS299 (AD)
Job Posted: September 17, 2021
Job Closes: October 25, 2021

Full Time Permanent

Wages: Competitive w/Excellent Benefits

Description

Complete a variety of general duties within the manufacturing shop to assist skilled tradespeople enabling them to focus on specialized tasks in a clean and safe working environment. Goal of the position is to get to know the company, the work we do and the various trades we employ in order to move toward a future apprenticeship once skills have been assessed.

RESPONSIBILITIES

Monitor shop cleanliness, identify potential safety hazards due to untidiness, advise supervisor and clean up accordingly

Maintain compliance with health and safety procedures; inform management on unsafe practices

Maintain garbage and recycling program and prepare for weekly disposal

Prioritize and complete all tasks assigned by Manufacturing Manager in a timely manner

Complete a variety of tasks including but not limited to painting, general shop maintenance, assisting with assembly of automated machines, using the forklift to move parts, etc.

Receive parts through BOS receiving process and distribute where directed

At times, operate band saw and Blanchard grinder by cutting materials to the correct requirements and grinding plate steel to tolerance.

As needed, operate over head crane and forklift

At times, maintain equipment and perform basic preventative maintenance on saw equipment

Black oxide/coatings

Assist with deliveries of components and pick-ups of shop materials ordered

Follow outsourcing board, prioritized by Manager/Supervisor

Other duties as assigned

Exposure to several trades (Millwright, Electrician, Machinist) and experience in all areas to identify skills and future apprenticeship opportunities
